

Notice

To improve readability, we have partitioned our original hundred-plus page paper, *A Call for Legal Entrepreneurship*, into two papers.

[Anatomy of a Lawsuit](#)

This case study puts a multi-million dollar federal lawsuit “under a microscope” not only to study its anatomy, but also to help understand the ecosystem civil lawsuits occupy that often make them frustrating, time-consuming and expensive.

[A Call for Legal Entrepreneurship](#) (revised)

This monograph discusses law’s transition from a profession to a business, issues with self-regulation and in particular how more entrepreneurship within the *process* of law will help to improve the *practice* of law.
